

General News Notes From Various Points

The British and French fleets bombarded the forts of the Dardanelles on Friday with considerable effect. The bombardment of the Dardanelles was renewed, the announcement added, with airplanes and aeroplanes respectively.

A dealer in dental supplies in Minneapolis ordered over \$300 worth of his goods shipped free of all cost to the Dental Periodic committee of Winnipeg, to help fix the teeth of the soldiers. This was an expression of his company's sympathy, and he did not wish his name mentioned, as it was not intended as an advertising scheme.

The Western Daily Mercury says that when the Australian mail boat Maloja with 400 passengers on board was entering the English Channel on Saturday afternoon she was ordered to stop by an unknown armed merchantman. The mail boat ignored the order and made for Plymouth, whereupon the merchantman fired five shots at her although they all fell short. The Maloja reached Plymouth safely.

Sir William MacKenzie, president of the Canadian Northern Railway, stated that the driving of the golden spike in the last tie of the western end of the Transcontinental has been postponed owing to the general condition of the country.

When now existing, but added that the defence would run its first train across the southeast some time in July or August.

The trade and commerce department reports that Canada last year sent more wheat than ever before to Great Britain and more than any other country, except the United States. The total arrivals of Canadian wheat in Britain during 1914 was 31,457,000 cwt. as compared with 21,787,900 cwt. in 1913.

In a recent interview at Winnipeg, Sir William MacKenzie is reported as follows: "As to finance Sir William said that the time was coming, when Canadian railroads and other corporations would turn to the United States, which offered a fine money market."

Grain brokers engaged in business on the Chicago board of trade have refused to submit their books and records to government officials investigating the high prices of wheat and flour. As a result, it was declared, the inquiry, which centers in the causes for the advanced price of bread is at a standstill.

The sinking of the American steamer Evelyn, off the German coast, presumably by a mine, although the crew was saved, brought vividly before official Washington the dangers to which American vessels are exposed in the waters adjacent to the belligerent coasts of Europe. Official announcement was made that the United States government will not reply to German or British notes on the war zone and flag situation.

To aid in recruiting soldiers for the defence of the Empire, the Montreal Canadian club is planning a series of patriotic rallies in the city and throughout the province.

Last Saturday afternoon the first delivery hospital in Canada, a gift from the women of the province of Manitoba, was formally handed over to the military authorities.

A wind, snow and sleet storm has paralyzed telephone and telegraph wires in Iowa, western Minnesota, Kansas, Nebraska and South Dakota.

The Geneva correspondent of the London Express telegraphed last Tuesday that travelers reaching Basle, Switzerland, report that six Americans, including two women, were assaulted and maltreated by German soldiers at Strassburg, because they spoke only English.

Leading French-Canadian journals announce that Sir Lomer Gouin, premier of Quebec, will retire from that position and enter federal politics. If he does it is with the understanding that he is to be Sir Wilfrid's successor.

A dispatch from Amsterdam to the Exchange Telegraph Company says reports from the German frontier state that much uneasiness exists at the German fortified seaport of Cuxhaven, concerning two large submarines which have not returned to their base. The submarines are said to be two days overdue and it is feared they have been destroyed.

In the federal house members on both sides expressed the hope that there would be no necessity for an election until the close of the war. The question was disposed of by sending it to the special committee of the house which already had been appointed to consider the reform of the election act. The motion was made by Sir Robert Borden.

Another American steamer, the Carib, has been destroyed by a mine off the German coast, while a third Norwegian steamer, the Regin, has been torpedoed or destroyed by a mine off Dover. In the case of the Regin all the crew were saved by British destroyers, although not stated in the dispatches from Berlin. It is believed that the crew of the Carib also escaped.

Carter H. Harrison, now completing his fifth term as mayor of Chicago,

was defeated for the Democratic nomination by Robert M. Sweitzer, clerk of Cook county. Sweitzer's plurality was estimated at more than 15,000.

CHINESEMAN MAKES BIG MONEY IN TRUCK GARDENING
One Chinese Chinaman asked \$2,467 from 20 acres of irrigated land, on the Kootenai demonstration farm of the Southern Alberta Land Company, near Suffield, last year. With the exception of eight days' labor during the busiest part of the season he did all the work himself. The achievement constitutes a record for the province, and shows what could be reaped in 4 hundred places in the province.

Among other things this master gardener grew \$537 worth of green beans which he had planted 1,671 acres. He sold his corn as fast as it formed in the milk at 20 cents per dozen roasting ears. His bumper crop was potatoes. On 8.40 acres he grew spuds, of the meadow kind, to the value of \$1,241.10, an average of \$147.10 to the acre. A third of an acre of tomatoes brought him \$54 in cash.

CITY BUILDING AND DULL TIMES

How to Make a City of 10,000 Population—It is up to the Canadian Consumer

In a speech delivered before the Sherbrooke Board of Trade, Mr. J. H. Sherrard, Vice-President of the Canadian Manufacturers' Association, made some striking statements about the "Made-in-Canada" movement. After a general presentation of the arguments for the "Made-in-Canada" idea, dealing particularly with present conditions, Mr. Sherrard showed very conclusively what the practical application of the doctrine "in the purchases of the everyday consumer" would mean.

Adding Cities

Mr. Sherrard referred to Sherbrooke as an important city and said there were only twenty-two other cities in Canada as large or larger. Did they realize that if the boots now made in the United States and sold to Canadians were made in Canada, it would add another city to Canada as large as Sherbrooke? Canada was thought to be a great paper-making country, but did they know that if the business men of Canada would specify Canadian paper for their stationery, it would add another town to the "Made-in-Canada" list.

They all knew the value of a busy workmen mill to a city, and yet when the speaker asked the tailor to show him some Canadian tweeds he looked at him with a sort of mild pity and replied he did not make them up. When asked to have some samples ready the next morning the tailor looked troubled and said the jobber from whom he bought his cloth did not carry Canadian Tweeds. After the tailor in question had been informed they would be very stylish next year, and that the speaker intended finding a tailor who could keep him dressed up to the minute, the samples arrived the next morning and the speaker was good as any West of England cloth.

Made in Sherbrooke

In fact, they were so good that they were suspicious, and on asking the tailor he informed him that he had made in Sherbrooke. One thing that impressed the speaker about his Canadian rival was that it cost considerably less than he had been accustomed to pay, and that was one of the chief obstacles to popularizing Canadian goods of a better class. The tailor did not make as much money as he could out of imported cloths.

"MADE-IN-CANADA" AND UNEMPLOYMENT

How Civilian Fathers Furnish Work For Mechanics in Foreign Countries—Wisdom For Canadians

In the month of September, October and November, 1914, a Toronto manufacturing concern, one of the largest employers of labor in that city, tendered on three different City contracts, 10 aggregate tenders for three jobs being \$64,848. The contracts were awarded, respectively, to firms in Glasgow, Philadelphia and New York, whose aggregate tenders were \$64,528, \$607 or less than one-half of 1% below those of the Toronto firm. Hundreds of "idle" larger employees have been laid off in the last few months through lack of work. The contracts embraced pumps, machinery and iron castings.

In Winnipeg a few months ago the City Council awarded to the American Canning and Foundry Company of Birmingham, Ala., a contract for 1,100 tons of pipe, approximately \$60,000 worth of work. A Port William firm, whose price was only \$100 more than that of the United States firm, lost the contract when most of its plant was laid underbid by unemployed men walking the streets of Port William.

The Works Department in Toronto purchased its 1915 supply of paving bricks, valued at approximately \$40,000, for the most part in United States. If Toronto brick makers had secured the wages involved in this contract, instead of their rivals in Ohio, many workmen, now in the bread line, would have had several months longer work, and therefore more savings to tide them over the period of stress.

It would be unnecessary to demand under all circumstances that Civic Purchasing Departments should buy "Made-in-Canada" products. It would be found, however, that if the total cost of Toronto's unemployment relief measures were added to the cost of the purchase of foreign firms, who secured orders in competition with Canadian firms in Canada, that there would be a large saving to the taxpayers.

Self help is the best form of philanthropy, and by helping Canadian factory workers and Canadian manufacturers to secure a larger share of civic business, Canadian cities would be treading against unemployment.

The purchase of \$1,000 of goods in our own city, or in our own country instead of purchasing abroad, is the addition of one man and his family to Toronto or Canada instead of supporting him abroad.
